REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a battery comprising the limitations of claim 8 (including a conductive hot melt material between the cathode and the can). Applicant claims a battery comprising the limitations of claim 9 (including a non-conductive melt between the cathode and the seal assembly). Applicant claims a method comprising the limitations of claim 15 (including placing a conductive melt in the can). Applicant claims a method comprising the limitations of claim 18 (including placing a non-conductive melt between the cathode and seal assembly).

Tucholski, U.S. Pat. No. 6,300,004 B1, teaches a battery system comprising a casing, and a battery comprising a can having longitudinal axis, a length that is parallel to the axis, and a cross section relative to the axis that is rectangular for substantially the entire length of the can, the can having a closed end and open end, a cathode, an anode, a separator, and a seal assembly attached to the open end of the can, wherein the assembly comprises a seal and a current collector attached to the seal.

However, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a battery, as described above, further comprising a conductive hot melt material between the cathode and the can; a non-conductive melt between the cathode and the seal assembly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela J. Martin whose telephone number is 571-272-1288. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.
